## ATTIC VENTILATION INSPECTION REPORT

### INTAKE (SOFFIT / EAVES)

- Soffit vents present Y or N
- Soffit vents blocked Y or N
- Limited airflow into attic Y or N
- Continuous soffit vent Y or N
- Additional intake needed Y or N

### EXHAUST (ROOF VENTS)

- Ridge vent installed Y or N
- Box vents present (Qty: \_\_\_\_\_)
- Turbines present (Qty: \_\_\_\_\_)
- Solar fan present (Qty: \_\_\_\_\_)
- Mixed ventilation system Y or N

### ATTIC CONDITIONS

- Excessive heat buildup Y or N
- Insulation blocking eaves Y or N
- No visible air channels Y or N
- Signs of moisture Y or N
- Poor overall ventilation Y or N

**SYSTEM DIAGNOSIS** Intake restricted (air cannot enter properly) Y or N

Exhaust insufficient or uneven Y or N

Balanced system achieved Y or N

### RECOMMENDED SOLUTION

• **GOOD**

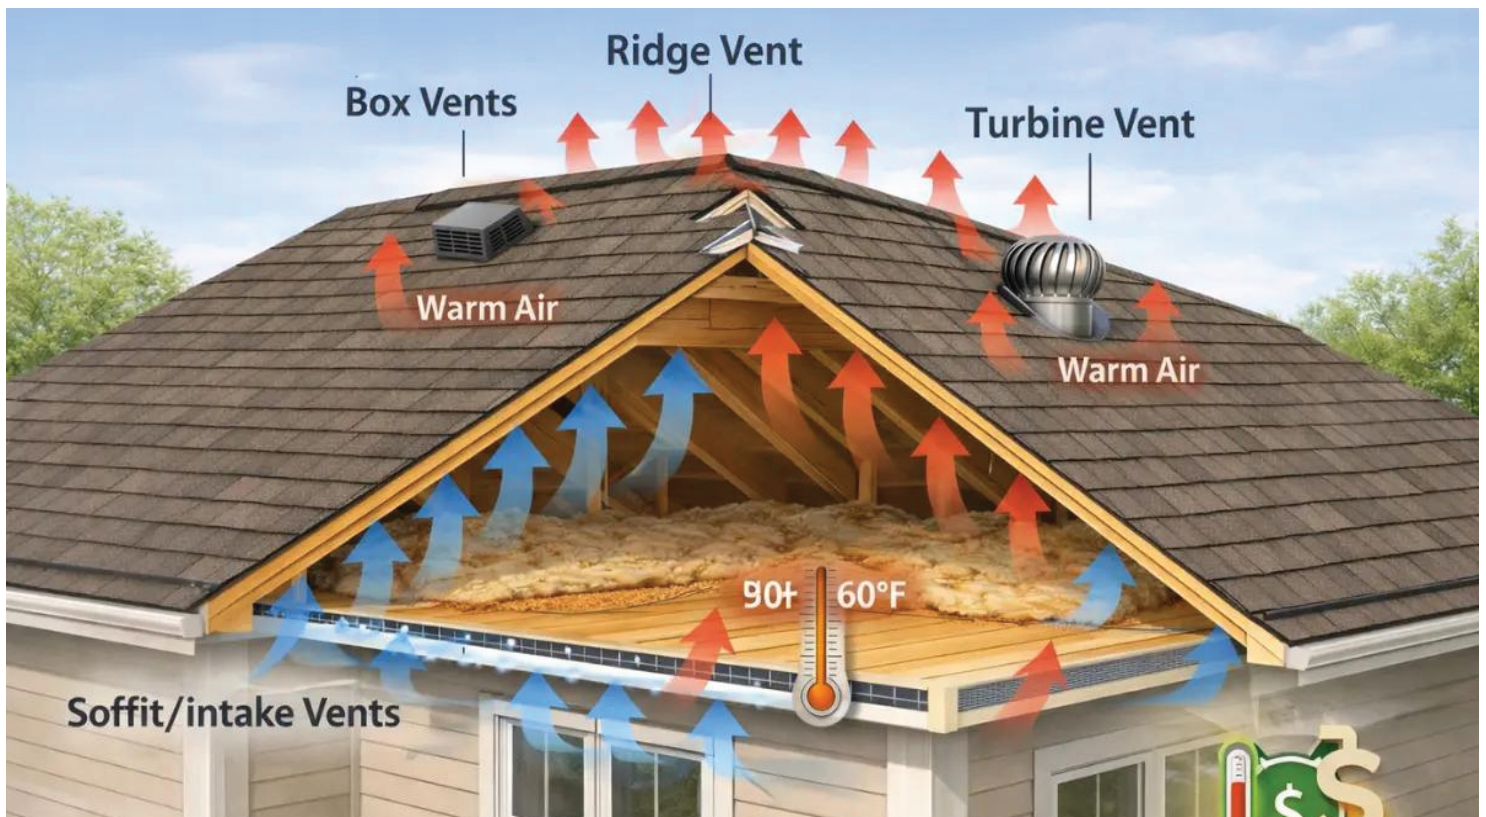

- Basic Airflow Fix
- Pull back insulation
- Install baffles

• **BETTER**

- Balanced Ventilation
- Improve / add soffit intake
- Install full baffle system

• **BEST**

- Maximum Performance System
- Ridge vent system
- Proper intake ventilation
- Optional solar attic fan(s)

Homeowner Recommendations: \_\_\_\_\_

*This will help: Reduce attic heat, Improve energy efficiency, Extend roof life and Improve overall airflow!*
